

Abhishek Vithlani

Unity developer with 4+ years experience building live mobile games, gameplay systems, and LiveOps features using C#, with a proven track record in end-to-end production and Live Ops. Developed 15+ polished features and reduced crash rate to under 0.5% using reusable module architecture, performance optimization, and Agile methodologies. Consistently exceed stakeholder expectations under tight deadlines.

EXPERIENCE

Sr. Unity Developer Trysnaverse Pvt Ltd

07-2025 - Present

- Led development of core gameplay systems and LiveOps features, coordinating with multiple developers and designers
- Implemented 10+ gameplay features improving progression loops and monetization systems.
- Refactored legacy gameplay modules using VContainer dependency injection, improving modularity and stability.

Software Engineer Gajabuja

07-2024 - 07/2025

- Developed polished features including Bonus Words, Daily Rewards, Power-ups, FTUE, Quests, Lucky Spin, Player Profile, Invite Friends, Weekly Events, Leaderboard, Lobby, and Daily Puzzle in Unity.
- Reduced crash rate to under 0.5% (99.5% crash-free) by identifying and resolving 20+ production bugs with code refactoring.
- Built procedural level generator producing 2700+ levels, reducing runtime 94% (36h→2h) and enabling daily puzzles.

Game Developer Fijit

06/2023 - 06/2024

- Designed and maintained 15+ mobile games focusing on LiveOps stability and gameplay systems with Unity.
- Collaborated across design/product teams; attended IGDC 2023 to enhance professional insights

Jr. Game Developer NukeBox Studio

08/2022 - 05/2023

- Implemented a key gameplay mechanic for *Cooking Channel*, contributing to the core game experience in Unity
- Integrated rewarded ads via ad SDKs, which accounted for over 40% of total ad impressions
- Identified and resolved critical bugs during development and QA phases, improving overall build stability

Game Programmer The AppGuruz

04/2021 - 07/2022

- Collaborated with MPL team on Match Masters prototyping and features.
- Improved communication and delivery in client-facing collaborations.
- Designed modular gameplay systems using ScriptableObjects and reusable components to improve feature scalability.

SKILLS

Unity (UGUI, Addressables, ScriptableObjects)

Dependency Injection (Zenject, VContainer)

Firebase

Git

Ads SDK Integration

LiveOps systems

Design Patterns (Observer, State, Strategy)

AI-assisted development workflows

Performance profiling

PROJECTS

Word Goose Chase – Unity mobile word puzzle game

Fijit Projects

Cooking Channel – cooking simulation mobile game

Merge Fever: Merge Games

Epic Merge: Magic Match Puzzle

Match Masters with MPL

PERSONAL PROJECTS

Missiles

Crush Ring

Easter Egg Toss

Fruit Ninja

Marble Mission

Slice It

Fire up

Brick Breaker
