Summary

Unity Developer with 5+ years of experience, 15+ games/projects, and 100+ features shipped across mobile games and interactive applications. Skilled in C#, gameplay systems, LiveOps, reusable architecture, performance optimization, and delivering production-ready features under tight deadlines.

Projects

<u>Word Goose Chase</u>	<u>Cooking Channel</u>	<u>Merge Fever: Merge Games</u>	<u>Epic Merge: Magic Match Puzzle</u>
Missiles	Crush Ring	Easter Egg Toss	Fruit Ninja
Marble Mission	Slice It	Brick Breaker	Match Masters with MPL

Skills

Unity	C#	Addressables	UGUI	Git	Performance Profiling
VContainer	Zenject	Scriptable Objects	Firebase	Ads SDK	Design Patterns
LiveOps	Agile	AI-assisted Development			

Experience

WB Games (Game of Thrones Dragon Fire) February 2026 – Present

- Freelance Unity Developer
- Worked With WB Team and create Muliple Features for Game of Thrones Dragon Fire.
 - Worked on Multiple Scripts to Make Marketing Videos and created multiple Playable ads for the game

Trysnaverse Pvt Ltd July 2025 – February 2026

- Sr. Unity Developer
- Led a team of 3+ developers and designers to ship core gameplay systems and LiveOps features.
 - Implemented 10+ gameplay features improving progression loops and monetization systems.
 - Refactored legacy gameplay modules using VContainer dependency injection, improving modularity and stability.

Gajabuja July 2024 – July 2025

- Software Engineer
- Engineered polished features for a mobile word puzzle game including Bonus Words, Daily Rewards, Power-ups, FTUE, Quests, Lucky Spin, Player Profile, Invite Friends, Weekly Events, Leaderboard, Lobby, and Daily Puzzle.
 - Reduced crash rate to under 0.5% (99.5% crash-free) by identifying and resolving 20+ production bugs through code refactoring.
 - Built a procedural level generator producing 2700+ levels, reducing generation runtime by 94% (36h → 2h) and enabling daily puzzle content.

Fijit June 2023 – June 2024

- Game Developer
- Designed and maintained 15+ mobile games focusing on LiveOps stability and gameplay systems with Unity.
 - Partnered with design and product teams to launch 15+ stable LiveOps gameplay systems, resulting in improved cross-team efficiency and enhanced player engagement.
 - Attended IGDC 2023 to enhance professional insights.

NukeBox Studio August 2022 – May 2023

- Jr. Game Developer
- Contributed to mobile game development with focus on gameplay mechanics and ad integration.
 - Implemented a key gameplay mechanic for Cooking Channel, contributing to the core game experience in Unity.
 - Integrated rewarded ads via ad SDKs, which accounted for over 40% of total ad impressions.
 - Identified and resolved critical bugs during development and QA phases, improving overall build stability.

The AppGuruz April 2021 – July 2022

- Game Programmer
- Collaborated with MPL team to prototype and deliver 5+ Match Masters features.
 - Improved communication and delivery in client-facing collaborations.
 - Designed modular gameplay systems using ScriptableObjects and reusable components to improve feature scalability.
